

YOUR BUSINESS PARTNER IN

CONVEYOR SYSTEMS

OSTIM INVESTMENT INC.

Conveyor systems are used in all industrial sectors such as airport, cement, environment, mining, manufacturing etc. Either as stand-alone equipment or in conjunction with other equipment.

It is absolutely essential to choose the right conveyor system as it is directly related to productivity, efficiency and output. Ostim Yatırım is at your side to carry out you the suitable solutions with years' experience and proficiency.

### **FROM CONCEPT TO COMPLETION**

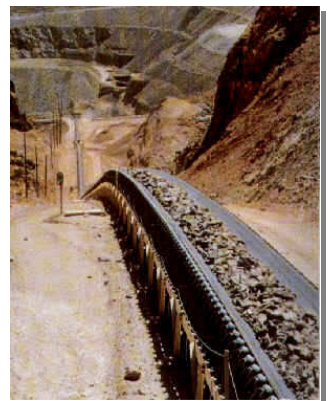

### **OSTIM YATIRIM HAS THE SOLUTION**

**Fully design, manufacture and install a multitude of conveyor systems**

### **Manufacturing a full range of conveyors**

Ostim Yatırım can implement the complete repertoire of modern industrial material handling needs, covering straightforward linear powered or gravity conveyors, inclined/declined conveyors curves, spirals and overhead conveyors. We can construct any conveyor on your requirements.

## The Advantages of Conveyor Systems

### Cost Effective Solutions

Ostim Yatırım conveyor systems can provide you substantial savings on labour costs by automating the production process and removing the need for excess staff. Ostim Yatırım conveyor systems can drastically improve the production process allowing a company huge savings on labour costs.

### Streamline Production Process

Conveyors and conveyor systems can drastically improve the efficiency of your production process by speeding things up and removing the chance of human errors leading to ruined/waste product. Advance conveyors can be integrated into any existing machinery and installed with minimal downtime.

## A PATH TO GROW

Our Conveyor Systems lets you:

- More efficient usage of space
- Reduced manual labour involvement
- Increased production output
- More efficient production process
- Reliable and cost effective

**GROW YOUR BUSINESS** by using our Conveyor Systems
